EDUCATION

University of South Carolina

Bachelor of Science (B.S.) in Computer Science

May 2024

Columbia, SC

PROJECTS

Musings | Kotlin, Jetpack Compose, Room persistence library with SQLite, MVI architecture

- Designed and engineered an Android note-taking application using Kotlin and Jetpack Compose, integrating modern UI principles for enhanced user experience.
- Implemented a unique feature inspired by BeReal, triggering notifications prompting users to jot down thoughts at random intervals within a customizable timeframe.
- Utilized the Room persistence library with SQLite to implement robust data storage, enabling efficient retrieval and management of user-generated notes.
- Optimized app performance and responsiveness through thorough testing and debugging, ensuring smooth functionality across various Android devices and OS versions.

Selene | Unity, C#

- Collaborated with a five-member team to develop a puzzle-platformer game using Unity and C#, resulting in the successful completion of a capstone project.
- Facilitated weekly in-person meetings to discuss progress, assign tasks, and ensure alignment with project goals and deadlines, demonstrating effective project management skills by setting and achieving weekly goals.
- Utilized Git and GitHub for version control, enabling seamless collaboration, code management, and issue tracking throughout the development lifecycle.
- Created comprehensive unit tests and behavioral tests using Unity's Test Runner to ensure code reliability and functionality across different game components.

Zombie Chase | C

- Created an original arcade-style game for the TI-84 Plus CE calculator line using the C programming language.
- Achieved widespread user adoption and popularity, as evidenced by receiving over 16,000 downloads since its release in 2016.
- Enhanced player experience through iterative refinement of game mechanics based on user feedback, while optimizing codebase for improved performance, efficiency, and stability.
- Demonstrated proficiency in C programming language through the development and maintenance of the project over several years.

ACHIEVEMENTS

Third Place Winner - Code-A-Thon

Oct 2022

Eagle Scout - BSA Scout Troop 51

Feb 2016

SKILLS

Languages: C, C++, C#, Clojure, CSS, HTML, Java, JavaScript, Kotlin, MySQL, Perl, PHP, Python

Tools: Unix/Linux, Android Studio, Git, Unity, data structures, database management, architectural design, Agile methodology, front-end development, back-end development, user interface design
